DISCLOSURES

Pzena Investment Management, LLC ("PIM") is a U.S.-registered investment adviser with the United States Securities and Exchange Commission. PIM follows a deep value investment approach.

Past performance is no guarantee of future results, and the past performance of any account or commingled fund managed by PIM should not be considered indicative of the future performance of any account or commingled fund managed by PIM. Investment return and principal value of an investment will fluctuate over time, may go down as well as up, and you may not receive upon redemption the full amount of your original investment. The performance information provided is historical in nature. The views and statements contained herein are those of Pzena Investment Management, LLC and are based on internal research.

Composite returns are benchmarked to the MSCI ACWI Index and the MSCI ACWI Value Index (the "Index"). The benchmarks are used for comparative purposes only. The MSCI ACWI captures large and mid-cap representation across 23 Developed Markets and 24 Emerging Markets countries. The index covers approximately 85% of the global investable equity opportunity set. The MSCI ACWI Value Index captures large and mid-cap securities exhibiting overall value style characteristics across 23 Developed Markets countries and 24 Emerging Markets countries. The value investment style characteristics for index construction are defined using three variables: book value to price, 12-month forward earnings to price and dividend yield. The Indices cannot be invested in directly.

The performance of the Indices reflects the reinvestment of dividends net of withholding tax rates. Gross Composite performance does not reflect the deduction of management fees, but reflects deductions for brokerage commissions and transaction costs, and reflects reinvested dividends. Net Composite performance reflects the deduction of investment management fees, brokerage commissions and transaction costs, and reflects reinvested dividends. The Pzena Global Best Ideas strategy is significantly more concentrated in its holdings and has different sector and regional weights than the Indices. Accordingly, the performance of the Composite will be different from, and at times more volatile, than that of the Indices.
