DISCLOSURES

Pzena Investment Management, LLC ("PIM") is a U.S.-registered investment adviser with the United States Securities and Exchange Commission. PIM follows a deep value investment approach.

Past performance is no guarantee of future results, and the past performance of any account or commingled fund managed by PIM should not be considered indicative of the future performance of any account or commingled fund managed by PIM. Investment return and principal value of an investment will fluctuate over time, may go down as well as up, and you may not receive upon redemption the full amount of your original investment. The performance information provided is historical in nature. The views and statements contained herein are those of Pzena Investment Management, LLC and are based on internal research.

The specific portfolio securities discussed in this presentation were selected for inclusion based on their ability to help you better understand our investment process. They do not represent all of the securities purchased or sold by PIM during the period, and it should not be assumed that investments in such securities were or will be profitable. Holdings may vary among client accounts as a result of opening dates, cash flows, tax strategies, etc. There is no assurance that any securities discussed herein remain in our portfolios at the time you receive this presentation or that securities sold have not been repurchased.

Composite returns are benchmarked to the TOPIX Net Total Return Index. The benchmarks are used for comparative purposes only. The TOPIX Net Total Return Index is a free-float adjusted market capitalization-weighted index that is calculated based on all the domestic common stocks listed on the TSE First Section including dividends net of withholding tax rates as calculated by TOPIX. The Index cannot be invested in directly.

The performance of the Index reflects the reinvestment of dividends net of withholding tax rates. Gross Composite performance does not reflect the deduction of management fees, but reflects deductions for brokerage commissions and transaction costs, and reflects reinvested dividends. Net Composite performance reflects the deduction of investment management fees, brokerage commissions and transaction costs, and reflects reinvested dividends. The Pzena Japan Focused Value strategy is significantly more concentrated in its holdings and has different sector and regional weights than the Index. Accordingly, the performance of the Composite will be different from, and at times more volatile, than that of the Index.
