

ANALYZING BRIBERY AND CORRUPTION

Investors Only

INTRODUCTION

While there is no one-size-fits-all approach to assessing and financializing bribery/corruption risks, we lay out some of what we have learned when approaching this issue in our investment process. Analyzing this issue requires deep fundamental research, coupled with a focus on active ownership and engagement. Since there is no one governance model that will ensure the elimination of these issues, our assessment of these issues and ongoing engagement with management is always caseby-case and company-specific. That said, there are certain risk factors and company-specific flags that can be helpful in the research process to identify companies with higher risk of exposure to bribery/corruption.

Financializing the risk of bribery/corruption or a known allegation is also fraught with difficulty (e.g., inherent imprecision of fine estimates; limits to what management can know, disclose and control) but nevertheless important when assessing the range of outcomes for a given investment. We lay out some of the tools at our disposal to help financialize this risk.

Active and ongoing engagement with management can help us get ahead of these issues and is also essential in the wake of a scandal to hold management accountable for failures. We detail some of the lines of enquiry we have found most helpful when discussing this issue with management teams.

We conclude with an example of how we have approached bribery/corruption for companies under coverage to bring to life our ESG integrated investment process.

DIMENSIONS OF BRIBERY/ CORRUPTION RISK

GENERAL RISK FACTORS

- 1. Geography
 - a. % of revenue or profits coming from countries at higher risk of bribery/corruption
 - b. Transparency International Corruptions Perception Index

SCOKE	COUNTRY/TERRITORY	67	Chile	53	Commune
88	Denmark	67	United States of	53	Cyprus Rwanda

DIMENSIONS OF BRIBERY/ CORRUPTION RISK

- 2. Government involvement
 - a. Flows of money to government or pseudo-government entities
 - b. Reliant on government for approvals/license to operate
- 3. Size of contracts at stake
- 4. 3rd party involvement
 - c. Use of subcontractors
 - d. Reliance on agents and/or lobbyists
 - e. Active JVs and participation in consortiums

While the issue is technically sector agnostic, some industries have particular exposure to these risk factors and so have developed a reputation for ongoing issues.

EXAMPLES OF HIGHER RISK INDUSTRIES	RISKINESS OF GEOGRAPHY	DEGREE OF GOVERNMENT INVOLVEMENT	SIZE OF CONTRACTS	DEGREE OF 3RD PARTY INVOLVEMENT	
Aerospace & Defense	High	High	High	High	
Extractives	High	High	High	High	
Engineering and Construction	Medium	High	High	High	
Telecom	Low	Medium	Medium	Medium	
Distilleries	Low	High	Low	Medium	
Pharma/Healthcare	Low	High	Medium	Low	
Banks	Banks play a supporting role for financing all industries and so are often the conduit of illicit funds

COMPANY-SPECIFIC FLAGS

- 1. Undue success in one or more specific regions (i.e., is the company always winning contracts)
- 2. Unusual flows of money
 - a. Significant charitable donations in one or several regions
 - b. Significant entertainment expenses
- 3. Staff movements/resignations

INCORPORATION INTO FUNDAMENTAL RESEARCH

FINANCIALIZATION - DIRECT:

- Fines:
 - If fines are already known/disclosed then these can be incorporated directly into the model
 - If fines are unknown, then they can be estimated using past precedent. This is particularly true
 when falling under domestic anti-corruption statues, e.g., Foreign Corrupt Practices Act FCPA
 and UK Bribery Act (UKBA)
- · Position-Sizing:
 - Since the range of fines will vary, position sizing should account for inherent riskiness of these fines and any uncovered issues
 - We can mitigate portfolio risk by maintaining a smaller position size for companies impacted by this risk factor

FINANCIALIZATION - INDIRECT:

- Regulatory Penalties:
 - Companies may be subject to consent decrees or other government-imposed penalties, e.g., a
 bank may be held to higher capital requirements or a company may be prevented from paying
 bonuses which could lead to talent attrition
- · Reputational Damage:
 - Widens the range of outcomes for an investment, e.g., risk of public backlash; diminished employee morale leading to talent attrition; reduced market access; and loss of customers
 - In extreme cases it can increase a company's cost of capital and/or close off certain markets

ENGAGEMENT TOPICS

Engagement on this topic can serve two purposes:

- 1. To try and get ahead of any risk of a bribery/corruption incident by better understanding the risk profile of an investment
- 2. Once an incident of bribery/corruption has occurred, it is important to continually engage to hold management accountable and understand the range of remediation activities and the inherent associated tradeoffs.

Some lines of enquiry that can help when probing management on this issue include

- · Company governance
 - Tone from the top on these issues
 - Board effectiveness (independence, experience, independent effectiveness review, etc.)
 - · Agenda of audit committee
 - · How different levels of the organization are incentivized
- Anti-bribery/corruption policies and controls:
 - · How they are implemented and monitored
 - How effectiveness is determined/assessed
- Use of agents/lobbyists
 - Sourcing process
 - · Operating practices and oversight capabilities
- Remediation
 - · Sense of ownership for remediation, e.g., full cooperation with authorities vs. denial
 - · How and why these issues will never happen again
 - Reasons for executive resignations (as appropriate)

CASE STUDY

ANDRITZ: ENGINEERING & CONSTRUCTION

- ESG/Investment controversy: engineering & construction is a high-risk industry for bribery and corruption issues
- · Research Insight:
 - Analyzed and engaged on the following to get comfortable that Andritz was a responsible operator:
 - · History of company financials, including balance sheet strength, margins, etc.
 - · Company process to determine whether to reject or bid for a project
 - Operating policies and procedures, including project management risk assessments that include environmental and social issues
 - Allegations made by one third party ESG data provider of lax operating standards in one prior project were dated and unrelated to projects operated by Andritz
- Research challenges: strong policies, procedures and operating practices are not a guarantee that there will be never be any future issues
- Ongoing engagement objective: continually probe on the issues above to make sure there is no change in our assessment of the risk profile of the investment

FURTHER INFORMATION

These materials are intended solely for informational purposes. The views expressed reflect the current views of Pzena Investment Management, LLC ("PIM") as of the date hereof and are subject to change. PIM is a registered investment adviser registered with the United States Securities and Exchange Commission. PIM does not undertake to advise you of any changes in the views expressed herein. There is no guarantee that any projection, forecast, or opinion in this material will be realized. Past performance is not indicative of future results. All investments involve risk, including risk of total loss.

This document does not constitute a current or past recommendation, an offer, or solicitation of an offer to purchase any securities or provide investment advisory services and should not be construed as such. The information contained herein is general in nature and does not constitute legal, tax, or investment advice. PIM does not make any warranty, express or implied, as to the information's accuracy or completeness. Prospective investors are encouraged to consult their own professional advisers as to the implications of making an investment in any securities or investment advisory services.

The specific portfolio securities discussed in this presentation are included for illustrative purposes only and were selected based on their ability to help you better understand our investment process. They were selected from securities in one or more of our strategies and were not selected based on performance. They do not represent all of the securities purchased or sold for our client accounts during any particular period, and it should not be assumed that investments in such securities were or will be profitable. There is no assurance that any securities discussed herein remain in our portfolios at the time you receive this presentation or that securities sold have not been repurchased.

For U.K. Investors Only:

This marketing communication is issued by Pzena Investment Management, Ltd. ("PIM UK"). PIM UK is a limited company registered in England and Wales with registered number 09380422, and its registered office is at 34-37 Liverpool Street, London EC2M 7PP, United Kingdom. PIM UK is an appointed representative of Mirabella Advisers LLP, which is authorised and regulated by the Financial Conduct Authority. The Pzena documents are only made available to professional clients and eligible counterparties as defined by the FCA. Past performance is not indicative of future results. The value of your investment may go down as well as up, and you may not receive upon redemption the full amount of your original investment. The views and statements contained herein are those of Pzena Investment Management and are based on internal research.

For EU Investors Only:

This marketing communication is issued by Pzena Investment Management Europe Limited ("PIM Europe"). PIM Europe (No. C457984) is authorised and regulated by the Central Bank of Ireland as a UCITS management company (pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011, as amended). PIM Europe is registered in Ireland with the Companies Registration Office (No. 699811), with its registered office at Riverside One, Sir John Rogerson's Quay, Dublin, 2, Ireland. Past performance is not indicative of future results. The value of your investment may go down as well as up, and you may not receive upon redemption the full amount of your original investment. The views and statements contained herein are those of Pzena Investment Management and are based on internal research.

For Australia and New Zealand Investors Only:

This document has been prepared and issued by Pzena Investment Management, LLC (ARBN 108 743 415), a limited liability company ("Pzena"). Pzena is regulated by the Securities and Exchange Commission (SEC) under U.S. laws, which differ from Australian laws. Pzena is exempt from the requirement to hold an Australian financial services license in Australia in accordance with ASIC Corporations (Repeal and Transitional) Instrument 2016/396. Pzena offers financial services in Australia to 'wholesale clients' only pursuant to that exemption. This document is not intended to be distributed or passed on, directly or indirectly, to any other class of persons in Australia.

In New Zealand, any offer is limited to 'wholesale investors' within the meaning of clause 3(2) of Schedule 1 of the Financial Markets Conduct Act 2013 ('FMCA'). This document is not to be treated as an offer, and is not capable of acceptance by, any person in New Zealand who is not a Wholesale Investor.

For Jersey Investors Only:

Consent under the Control of Borrowing (Jersey) Order 1958 (the "COBO" Order) has not been obtained for the circulation of this document. Accordingly, the offer that is the subject of this document may only be made in Jersey where the offer is valid in the United Kingdom or Guernsey and is circulated in Jersey only to persons similar to those to whom, and in a manner similar to that in which, it is for the time being circulated in the United Kingdom, or Guernsey, as the case may be. The directors may, but are not obliged to, apply for such consent in the future. The services and/or products discussed herein are only suitable for sophisticated investors who understand the risks involved. Neither Pzena Investment Management, Ltd. nor Pzena Investment Management, Ltd. or Pzena Investment Management, Ltd. are subject to the provisions of the Financial Services (Jersey) Law 1998.

For South African Investors Only:

Pzena Investment Management, LLC is an authorised financial services provider licensed by the South African Financial Sector Conduct Authority (licence nr: 49029).
